

05. Enter outsourcing

A. Export Processing :

1 - The customs dossier :

1.1 Documents to be submitted:

- The export declaration : 02 originals ;
- A detailed list of goods for export shipment : 02 originals ;
- The norm of each code in the shipment of goods exported (for PLU norms have not yet registered with Customs) : 02 originals ;
- The materials currently supplied by the enterprise (if any) corresponding to the amount of processed products on the export declaration (form 11/HQ-GC) : 02 originals

1.2 Documents to be paid more

- Permit of the competent authority if the processor supply of raw materials on the list of exported goods must be licensed 01 original.

1.3 Documents to be produced:

License referred to in point 1.2 above : 01 original copy for comparison with the stamp payable deduction monitoring or originals accompanied by subtraction card back (if already Customs Stamp deduction monitoring)

2 - customs procedures for export of processed products : made as customs procedures for goods exported under the purchase contract as stipulated in Decision No. 16 56/2003/QĐ-BTC / 4/2003 , but do not take the step of checking the tax (except for products made from purchased materials from suppliers in Vietnam market , export tax should be measured for this material) . Also, have done more :

2.1 For customs officials

- When registering export declarations , customs official registration statement to check the registration norms for the goods item in the export declaration (if the item codes that are not registered at the request of business Table norms shall submit to register) ; filled number , date of declaration of dashboard on export declarations (09/HQ-GC form) as the import declaration registration .

- For export shipments decided to check the actual goods , when testing stored samples to compare with the raw materials constituting the product , compare it with the level of actual export products .

2.2 Obligations of business :

- Present the material flow patterns and norms are registered with Customs to Customs for comparison .

- For export shipments are exempt from actual inspection of goods , the case materials were not sampled or modified materials in the production process (eg wool before weaving through the steps to purge , dyed ...) Customs can not be collated , free enterprise is responsible for the proper use of imported materials processing contracts .

3 - For the Customs Department information technology applications to manage public goods :

- When the declaration is registered on the machine parameters of their declarations on the criteria or test data from the enterprise .

- After the test results to actual goods actually exported data into the computer .

4 - Customs procedures for contract or sub- contract machining conditions apply Registration form declaration 01 times comply with the provisions of the written declaration registration 01 times .

5 - Customs procedures for processing export shipments moving gate comply with customs procedures for export of goods specified in gate transfer 53/2003/QD-BTC Decision 16 / 4/2003 and Decision No. 145/2003/QD-BTC day 12/9 / , 2003.

For shipments to the actual inspection of goods at the border , save businesses produce samples and materials to the registration table with Customs to Customs for comparison; Customs Department to implement the gate collate material flow patterns and norms as specified in point 2.1 above .
