

Sea Freight

1 - For every Sea: there are 2 types of FCL (Full container loads) and LCL (LCL - by Volume - cbm) : Due to the safety of the goods as well as fast shipping time . Container ships can visit many ports on the same cruise ship owner is convenient and cost savings for customers who use this service .

- FCL (Full Container Loading): including containers such as 20/40 / 40HC / 45 / 20RF / 40RF / 20OT (Open Top) / 40OT / 20GOH (Garment Hanging On) / 40GOH .

Goods are packed in original container 20DC / 40DC or 40HQ . Maybe one or more of the owners close to one consignee . Sometimes more than one sent by the receiver but one stood out as representative receiving procedures .

This is the easiest way customers handle but needs attention to a few key points after commodity handle container :

- Must check whether the agent system handle agents at the port of destination or not ?
- Check with the customer payment terms are Collect or Prepaid Plans .
- Check rates with shipping lines have at least 3 destination port is the main port of them to ensure the best rates .

Must advise clients on related services such as customs clearance , cargo packing , transporting , lifting , quarantine , fumigation (for agricultural and aquaculture) ,

- LCL (Less Container Loading): is calculated by volume (cbm) . Service to the line : the EU , Asia , ... through the Co - loader Vinatrans , Everich , Sotrans , ANC (An Nhon Fwd) , ...

Goods are packed in original shipping container sent by many people for many different consignees .

Currently, many companies make the delivery of this service , not high profit as before , including some online rates are not only free but also be spent to commission such as SIN , TWN , and HKG .

When retail sales points to note are as follows:

- Check whether the agent system handle agents at the port of destination or not ?
- Check with customer payment terms are Collect or Prepaid Plans . This is the key point when doing retail , because it relates to how the systems handle customer agent at the port of destination
- Check rates for at least 3 co - loader to ensure the best prices for online services.

Must advise clients on related services such as customs clearance , packaging , inland transport , delivery

way at the port of destination ,

- **Bunker ship (sailing):** this is the kind of specialized vessels for carrying bulk goods such as rice , wheat flour , cassava chips , iron , steel , fertilizer , ...

This method is used to transport goods in bulk or packaged , such as agricultural products , iron and steel , ... To handle this type of service are required to have experience in reading the acronym in commercial contracts and the contract of carriage . Know the schedule of the train as well as knowing the ship operating center in the region , ...

Often the freight forwarding company in Vietnam is the only freight brokers , rarely stand out arrangements , ship brokers directly to shipowners as well as abroad.

- **By Train Ro / Ro (Roll on - Roll off):**

Used to transport all kinds of machinery and equipment is capable of operating without the aid of other means such as cranes or forklifts .

2. For the price of the Sea:

In Sea prices always attach the following terms :

- **All Water:** the price includes the shipping container during transport by sea (for U.S. online) .

- **All In:** price includes all surcharges .

- **MLB (Mini Land Bridge):** the price includes the shipping containers between the ports , then transferred to the secondary port (the last port requested) by truck or train , ... (for U.S. online) .

- **DDC (Destination Delivery Charge).**

- **WRS (War Risk Surcharge)** .

- **PCS (Panama Channel Surcharge)**

- **CAF (Currency Adjustment Factor)**

- **BAF (BULKER Adjustment Factor):** fuel surcharge (for Europe) .

- **EBS (Emergency Bunker Surcharge) :** fuel surcharge (for Asia) .

- **GRI (General Rate Increase) :** freight surcharges (only happens every peak season) . = **PSS (Peak Season Surcharge) :** freight surcharge of every high point in the season .
